

Pazo de Valdomiño

was founded in 1996 in Goián (Galicia, Spain), a small village in the Portuguese border. Our difference towards our competitors is based on the exclusive use of Albariño grapes as main basic ingredient of Aguardientes and liquors. Above all this, our production process is fully manufactured according to the traditional methods. Pazo de Valdomiño also has its own plantation , 35 hectares of vineyards and 10 hectares of Mirabelles. All in all, our main concern is to have a sustainable high quality in each and every step of the production.

Brief History

The owner's family has its roots in Goián , where the distillation process has been lost in time. In 1877 José Ozores (Miguel's great, great, grandfather), an alchemist, created our famous Licor de Cilantro (liquor of coriander) , that was exclusively produced in this village. Nowadays one can enjoy it all over Spain as well as in several other countries.

OUR REGION

On the border with Northern Portugal next to the mouth of the River Miño and within the Rías Baixas G.I., in the sub region of the O Rosal, lies our famous distillery Pazo de Valdomiño.

The region whose excellent reputation has greatly increased in recent years due largely to the high quality of the wines grown here and a microclimate ideally suited to viticulture, fruit growing and horticulture. Products found growing here include the famous Mirabelle, Kiwi fruit and of course the Albariño grape.

PRODUCTS

At Pazo Valdomiño we have three different product lines:

1. Aguardientes and traditional liquors production.
2. Modern spirits, among we gins.
3. Ecological production.

1. Traditional Aguardientes

Since 1996, our main purpose had been the production and commercialization of the traditional Aguardientes keeping the legacy of our ancestors. In addition, we adapted new technologies to the production and bottling processes, despite of keeping some traditional methods along the chain production , such as the careful selection of all and each raw material , the labeling (Ginabelle) or the super premium bottles that have an exclusive Italian design and production.

We highlight two ranges of products among our Aguardientes and Liquors:

a) Pazo Valdomiño: high quality product under the Orujo Protected Designation of Origin (PDO) . Involved in an elegant design bottle, is one of the few premium Galician Aguardientes and liquors in the market.

It has been awarded several times through all this years: among others, the Bordeaux Golden Medal and several Wine Tasting Golden Pots awarded by the Galician Government , to Aguardientes and liquors of the Orujo PDO

Circle and Torcolato Bottles: The best of the premium Aguardientes. Exclusive. The perfect gift.

b) Fonte do Frade: Highly competitive products, with recognized quality under the Orujo Protected Designation Origin. Excellent price-quality relationship supported by a standard packaging that will appeal our customer. Orujo cream and chocolate with cherries are included in this range of products. It is another awarded product.

2. Our gins and other spirits

GINABELLE Gin

In 2012 following the trend line of Gin&Tonic in Spain, Miguel Oliveira starts a new project, Ginabelle. A hunger for an unique natural gin, led as to experiment with mirabelle plums, Albariño grapes and gorse. That is how Ginabelle was created , a balanced and complex gin, completely different from others, a fully super premium product. More than one kilo of distilled fruit is used in each bottle.

Awards:

-2013 -Before even having a brand , Ginabelle (Gin + mirabelle) won the DIAGEO (spirits world biggest company) Seed Program.

-2015. - Ginabelle is launched and was considered the best contemporary gin at the London's Distilling Craft, London

-2016 . Golden Medal at the Brussels International Competition (Spirit Selection)

Mexico 2016 one of the most important spirit competition all over the world.

CELTIC GIN

Two new gins were launched in 2016 under the brand of Celtic and focusing the mainstream market:

Celtic London Dry: classic and dry , though with our particular touch.

Celtic Fresh-a (Strawberry): using distilling fresh strawberries , carries freshness and sweetness which is something completely on trade special among women.

Other spirits

We highlight Arima, a sloe gin or JokerMaster a german herbs liquor
New interesting projects will be launched in 2017

3. Ecological Production

Pazo do Valdomiño is a certified company for the production of
ecological spirits beverage .

Up till now, we have been creating ecological Gin and Vodka,
but others will be produced in a near future.

COMMERCIALIZATION

ON TRADE

We deal with the best national distributors and import companies. What we mean by “the best” are those that are perfectly capable to sell our high quality products with the same commitment as ourselves . They are undoubtedly our partners.

OFF TRADE

Right now, we are dealing with some of the best national retail chains as Gadisa , Froiz, Carrefour and Mercadona.

In export, our products can be found in chains as important as Selfridges in London
