GIN XORIGUER

Review: 0

Date: 09-11-15

- APPELATION

Gin Xoriguer

- INGREDIENTS

Water, neutral alcohol with agricultural origin, juniper berries, all of them high quality and carefully selected.

- ELABORATION PROCESS

Gin Xoriguer manufacturing is done by copper stills called primitives. They work directly over fire and are formed by a cylindrical copper cauldron where the liquid to distillate is placed together with juniper berries. Generated steam by the temperature increase goes through cooling coil refrigerated with cold water where this steam is condensed once again and collected in metal pots. Later, it is trespassed to a tank where, once quality control is passed, it is strained and bottled in every format.

- TASTING NOTES

Nose:

You can appreciate its dry character smelling it and its soft final with a hint of juniper. Gin Xoriguer is very aromatic and easily recognizable among all others. The elaborated distillation can be clearly appreciated.

Taste:

This gin is spicy in the palate and the way through the mouth is very soft. Light herbal remaining transform into a long presence of juniper. Short and dry final.

Colour:

Just taking a quick look, you can appreciate the dense body of juniper oil, besides, its medium teardrop indicates the great distillation characteristic of Xoriguer.

- Physical and chemical analysis

Alcohol: 38% Vol. (+/- 0.2)

PH: 8.5-9.7

- Consuming before:

There is no date of preferential consumption following the order R.D.212/1992

- Allergies
